Title: Web Developer

Skills: Technologically savvy custom applications developer able to implement system components or systems using relevant technologies and methodologies

Posted: July 10, 2008

Location: Cherry Hill, NJ

Term: Full time

Job overview:

The Web Developer must be interested in implementing and maintaining web and desktop applications. This position focuses on back-end and middle tier development, but will require front-end skills and an eye for detail.

Qualifications:

- Have a good understanding of front-end web technologies including XHTML, CSS, and JavaScript.
- Have an interest in writing desktop applications using WinForms and WPF.
- Be able to design and implement data structures such as XML and SQL Server.
- Understand software development methodologies.
- Be a team player, starting with conception and requirements gathering all the way through testing and delivery.
